

# Puppet Master Sound System vs Minion FX System

DIFFERENCES NOTED IN RED

**The Puppet Master Sound System™** can take your character, puppet, scene or static prop to the next level and layers of realism to your attraction. This sound system comes with a USB cable and easy to use software to allow you to load up to four custom sound clips to the device. Load music, sound effects and voice-overs. Once you've loaded your sounds you can trigger them with the touch of a button which is easy to hide inside the puppet or prop. The level of customization that this product allows you to achieve will make you glad you purchased it.

## FEATURES:

- **Wired, 4-button controller (3 foot cat 5 cable)**
- **Load up to 4 Audio Clips**
- Up to 5 Minutes Total of High Quality Audio Internal Memory
- Loop or Restart Sounds - looped sounds can play until you hit another button
- 2 Channels Available - Play 2 sounds at the same time
- 2.5" full range speaker
- Capable of over 100 Decibel output (Louder than a Chainsaw)
- Rechargeable Lithium Ion battery - typically lasts 6-10 hours on a full charge
- Weighs approximately 1 lb
- Approximately 4" x 4" x 2"

## INCLUDES:

- Puppet Master System
- **4 Button Wired Controller**
- 9v Wall Charging Cable
- 3' USB transfer cable
- **3' cat 5 trigger cable (can connect longer cable if needed)**
- Link to download Windows compatible software (can be used on Mac with Bootcamp software)
- Access to VFX's FREE sound effects library

**The Minion FX System™** is about one pound 4"x4"x2" box that puts out sound Over 104 decibels at about a 1 meter distance. That is louder than a chainsaw. Those specs are pretty impressive alone, add to that the capability to program about 5 minutes of high quality audio, ANY sounds you want (up to 12, utilizing the hacker kit, or additional Key fob controller) on two different channels, and the possibilities get even better. Now add to that, a microphone and a six button wireless trigger (both included), and you are getting closer to what the Minion can do. Each trigger has a different wireless address, so you can use two systems together without triggering the wrong one. Then add the six button hacker kit (sold separately) with wireless transmitter so you can put triggers into an actor's prop, and you've got a haunt attraction actors new favorite toy.

## FEATURES:

- **Wireless, 6-button Key fob Controller (30-50 Foot Range)**
- **Load up to 12 Audio Clips (6 per Key fob controller or Hacker kit)**
- **Use as a PA System**
- Up to 5 Minutes Total of High Quality Audio Internal Memory
- Loop or Restart Sounds - looped sounds can play until you hit another button
- 2 Channels Available - Play 2 sounds at the same time
- 2.5" full range speaker
- Capable of over 100 Decibel output (Louder than a Chainsaw)
- Rechargeable Lithium Ion battery - typically lasts 6-10 hours on a full charge
- Weighs approximately 1 lb
- Approximately 4" x 4" x 2"
- **Capabilities to control lighting and motion effects (with additional products)**
